Education: Computer Science and Information Technology, Alma Mater Studiorum, Bologna, Italy, 2002/2006
Pronouns: he/him/his

I am a Frontend Engineer with growing experience and a big passion for web technologies, work strategies and methods since around 2005. I consider myself a very dedicated worker, precise to achieve the goals I'm assigned to, confident in finding the best solutions for different scenarios. I like to participate in brainstorming stages of projects. I am able to manage the application development in medium/big projects, to deal with customers and to reach goals by making decisions under pressure. My experience for about a couple of years as Scrum Master makes me also a strong supporter of Agile methodologies and I feel motivated to help eventual agile transformation in the environment I work for.

My ambition is to be able to work in a challenging and dynamic environment, where I can develop and improve myself, not only as a developer but also as a person, give and receive experience with everybody and keep updated my professional skills.

Frontend Engineer Skills	Scrum Master Skills
